

Amendments to the Specification:

Please replace the paragraph beginning at page 18, line 17 (after the table) with the following amended paragraph:

Referring back to FIG. 3, the user may select the poet assistant user interface 50. An example of poet's assistant interface is shown in FIG. ~~15~~ 46, described below. In a poet's assistant dialogue box within the word processing program, the user selects as many poet's assistant windows as desired. For each selected window, the user further chooses a poet personality, and a choice of 'next word display,' 'finish line display,' or 'finish poem display.' As will become apparent, a choice of next word display will provide a 'next word' after the user types a word in the word processing program, the choice of 'finish line' will provide a completed line after the user types a word in the word processing program, and the choice of 'finish poem' will provide a complete poem, i.e., one stanza, after the user types a word in the word processing program.
